

PHARMACOGNOSY

Practicals Syllabus:

1. Morphological Identification of the following drugs:

- Ispaghula,
- Senna,
- Coriander,
- Fennel,
- Cardamom,
- Ginger,
- Nutmeg,
- Black Pepper,
- Cinnamon,
- Clove,
- Ephedra,
- Rauwolfia,
- Gokhru,
- Punarnava,
- Cinchona,
- Agar.

2. Gross anatomical studies (Transverse Section) of the following drugs:

Ajwain,

Datura,

Cinnamon,

Cinchona,

Coriander,

Ashwagandha,

Liquorice, Clove, Curcuma, Nux vomica, Vasaka

3. Physical and chemical tests for evaluation of any FIVE of the following drugs:

Asafoetida,

Benzoin,

Pale catechu,

Black catechu,

Castor oil,

Acacia,

Tragacanth,

Agar,

Guar gum,

Gelatine.

CONTENTS

S. No.	EXPERIMENTS	Page No.
MORPHOLOGICAL CHARACTERISTICS OF ORGANISED DRUG		
1.	To identify the morphological characters of given organised drug (Ispaghula).	
2.	To identify the morphological characters of given organised drug (Seena).	
3.	To identify the morphological characters of given organised drug (Coriander).	
4.	To identify the morphological characters of given organised drug (Fennel).	
5.	To identify the morphological characters of given organised drug (Cardamom).	
6.	To identify the morphological characters of given organised drug (Ginger).	
7.	To identify the morphological characters of given organised drug (Nutmeg).	
8.	To identify the morphological characters of given organised drug (Black pepper).	
9.	To identify the morphological characters of given organised drug (Cinnamon).	
10.	To identify the morphological characters of given organised drug (Clove).	
11.	To identify the morphological characters of given organised drug (Ephedra).	
12.	To identify the morphological characters of given organised drug (Rauwolfia).	
13.	To identify the morphological characters of given organised drug (Gokhru).	
14.	To identify the morphological characters of given organised drug (Punarnava).	
15.	To identify the morphological characters of given organised drug (Cinchona bark).	
16.	To identify the morphological characters of given organised drug (Agar).	
TRANSVERSE SECTION OF DRUGS		
17.	To identify the Transverse Section of Datura.	
18.	To identify the Transverse Section of Cinnamon.	
19.	To identify the Transverse Section of Cinchona.	
20.	To identify the Transverse Section of Coriander.	
21.	To identify the Transverse Section of Ashwagandha.	
22.	To identify the Transverse Section of Liquorice.	

23.	To identify the Transverse Section of Clove.	
24.	To identify the Transverse Section of Curcuma.	
25.	To identify the Transverse Section of Nuxvomica.	
PHYSICAL & CHEMICAL EVALUATION OF DRUGS		
26.	To perform the physical and chemical tests for evaluation of Asafoetida.	
27.	To perform the physical and chemical tests for evaluation of Benzoin.	
28.	To perform the physical and chemical tests for evaluation of Pale Catechu.	
29.	To perform the physical and chemical tests for evaluation of Black Catechu.	
30.	To perform the physical and chemical tests for evaluation of Castor Oil.	
31.	To perform the physical and chemical tests for evaluation of Acacia.	
32.	To perform the physical and chemical tests for evaluation of Tragacanth.	
33.	To perform the physical and chemical tests for evaluation of Agar.	
34.	To perform the physical and chemical tests for evaluation of Guar gum.	
35.	To perform the physical and chemical tests for evaluation of Gelatine.
