## TRANSVERSE SECTION OF CLOVE

T. S. of Clove

Practical -23

Date: .../..../......

## **GROSS ANATOMICAL STUDIES (TRANSVERSE SECTION) CLOVE**

Aim: To identify the Transverse Section of Clove.

Reference:

Biological source: It consists of dried flower buds of Eugenia caryophyllus.

Family: Myrtaceae

Gross anatomical studies:

S. No.	Description	Observation
1.	Cuticle epidermis	
2.	Oil gland	
3.	Sphaeraphide	
4.	Vascular Bundle	
5.	Parenchyma	
6.	Aerenchyma	
7.	Columella	
8.	Cortex	
9.	Pith	
10.	Calcium Oxalate crystal	

**Report:** The given crude drug was identified as ......with various histological characters (T.S.).

## **Questions Bank**

- 1. What are the anatomical studies of Clove?
- 2. Write the biological source of Clove.
- 3. What are the uses of Clove?
- 4. What is the Cuticle epidermis?
- 5. What is the role of oil gland in clove?
- 6. What is the Aerenchyma?
- 7. What is the difference between parenchyma and aerenchyma?
- 8. Write the role of cambium.
- 9. What is the Sphaeraphide?
- 10. Draw the microscopical structure of Clove.
