

National Immunization Schedule for Adult Vaccine

S. No.	Vaccine	When to given	Dose	Route	Site	Uses
For Adults						
1.	Influenza inactivated (IIV4) or Influenza recombinant (RIV4)					
2.	Influenza live attenuated (LAIV4)					
3.	Tetanus, diphtheria, pertussis					
4.	Measles, mumps, rubella (MMR)					
5.	Varicella (VAR)					
6.	Zoster recombinant (RZV)					
7.	Human Papilloma Virus (HPV)					
8.	Pneumococcal (PCV15, PCV 20)					
9.	Hepatitis A					
10.	Hepatitis B					
11.	Meningococcal A, C, W, Y					
12.	Haemophilus influenza type b (Hib)					

Practical - 2

Date: / /

Aim: To study in detail about the National Immunization Schedule for adult vaccine.

Reference:.....

Requirements:.....

Apparatus/Equipment Required:.....

Chemical Required:.....

Theory: Vaccinations are readily available for such common adult illnesses as influenza (flu), pneumococcal disease, herpes zoster (shingles), human papillomavirus (HPV), pertussis (whooping cough), hepatitis A and hepatitis B. Vaccinations against less common diseases such as measles, mumps, rubella (German measles), tetanus (lockjaw), diphtheria and varicella (chickenpox) are also needed by some adults. The Centers for Disease Control and Prevention’s (CDC) recommendations clearly identify people who are at risk for these diseases and who should be immunized to prevent these diseases and their complications. Consult your healthcare provider or local health department regarding your own immunization status as well as current immunization recommendations.

1. MMR Vaccine use:

2. DTP Vaccine use:

3. RIV4 Vaccine use:

4. VAR Vaccine use:

5. RZV Vaccine use:

6. HPV Vaccine use:

7. PCV Vaccine use:

8. Meningococcal Vaccine use:

Report: In detail Adult immunization Schedule was studied.

Questions Bank

1. What is the full form of MMR vaccine?
2. What is the full form of RIV 4 vaccine?
3. What is the full form of VAR vaccine?
4. What is the full form of RZV vaccine?
5. What is the full form of HPV vaccine?
6. What is the full form of PCV vaccine?
7. What is the use of MMR vaccine?
8. What is the use of VAR vaccine?
9. What is the use of Meningococcal vaccine?
10. What is the use of Pneumococcal vaccine?
