Practical - 3

Date:/
Aim: To study the National immunization schedule for Vaccines which are not included in the National
Immunization Program.
Reference:
Requirements:
Apparatus/Equipment Required:
Chemical Required:
Theory: Optional vaccines are those which are not included in the routine immunisation programme and give
on an optional basis.
Classification:
1. Paediatric Vaccines: – Rotavirus, DTaP, Haemophilus Type b Conjugate vaccine.
2. Adult Vaccines: – Hepatitis B.
3. Both: – Hepatitis A, Influenza, MMR, Meningococcal, Pneumococcal, Varicella, Typhoid, HPV, Rabies,
H1N1.
4. Under special circumstances: - Japanese Encephalitis, Yellow fever.
1. Rotavirus Vaccine use:
2. DTaP Vaccine use:
2. DTar vaccine use:
2. Harris D. Warnetter and
3. Hepatitis B Vaccine use:
4. Typhoid Vaccine use:
5. Rabies Vaccine use:
6. H1N1 Vaccine use:
7. Yellow fever Vaccine use:

Report: In detail National immunization schedule for Vaccines which are not included in the National Immunization Program was studied.

Questions Bank

- 1. What is the full form of H1N1 vaccine?
- 2. What is the full form of DTaP vaccine?
- 3. What is the dose of MMR vaccine?
- 4. What is the dose of Typhoid vaccine?
- 5. What is the full form of HPV vaccine?
- 6. What is the route of Pneumococcal vaccine for administration?
- 7. What is the use of Rotavirus vaccine?
- 8. What is the use of Rabies vaccine?
- 9. What is the use of Yellow fever vaccine?
- 10. What is the use of H1N1 vaccine?
