Calculation:

$$\text{Factor} = \frac{\text{Required quantity}}{\text{Quantity given}} = \dots\dots\dots$$

Practical - 9

Date: .../.../.....

Aim: To prepare and submit 50 gm of Sulphur Ointment.

Reference:.....
.....

Requirements:

Apparatus/Equipment required:.....

Chemical required:.....
.....

Theory: Sulfur is used to treat many kinds of skin disorders. Sulfur cream, lotion, ointment, and bar soap are used to treat acne. Sulfur ointment is used to treat seborrheic dermatitis and scabies.

Sulphur Ointment Formulation Table:

S. No.	Chemical Name	Quantity Given (100 gm)	Quantity Taken (Factor x Quantity given)	Uses of Ingredients
1.	Sulphur	10 gm		Anti-acne & Antifungal
2.	Yellow Soft Paraffin	90 gm		Base

Procedure:

Sulphur was passed through sieve no 85. Sulphur was triturated with a portion of simple ointment until smooth. Gradually add the remaining quantity and mixed thoroughly.

Storage: Well closed container in a cool place.

Uses: Sulfur ointment is used to treat seborrheic dermatitis and scabies.

Observation and Evaluation:

Name of the Preparation	Test	Specification	Observation
Sulphur Ointment	Description		
	Colour		
	Odour		
	Volume		

Result: I have prepared and submit the _____ in a neat and cleaned glass bottle and labeled it properly.
